---

Software Engineering Leader, seeking Senior Leadership roles. With over seventeen years of experience working on large and complex software systems. Ability to lead with emotional intelligence, capable of hiring, mentoring, motivating and team building for developing software products. Achievement-oriented, adaptable and organizationally aware manager, passionate about delivering products with significant customer impact.

---

## SKILLS

Management – Product Management, Agile Software Development, Hiring and Mentoring Software Developers, Technical Product Managers and Technical Product Owners, Collaboration across Cross-functional Teams.

Domain – SAML 2.0, Single Sign-On, Multi-Factor Authentication, Duo Two-Factor Authentication, Role-based Access Control, Attribute-based Access Control, Authentication, Authorization and Auditing, Identity and Access Management, Cybersecurity, Mobile Privacy and Security

Cloud – AWS EC2, AWS Lambda, AWS S3, AWS EBS, Datadog (for observability)

Platforms and tools – Linux, Android, proprietary automation platforms, IntelliJ Suite, VSCode, Git

Languages – Java, Python, Go, Unix Shell

Full-stack – MySQL, MariaDB, NoSQL, ReactJS, CSS, PHP, Bootstrap, HTML5

---

## WORK EXPERIENCE

Leader, Software Engineering @ Cisco Systems Inc., USA

Oct 2021 – Present

- I lead a team of twenty+ Software Developers, Technical Leads and Technical Product Owners in Cisco's Security Business Group. I hired and built about two-third of this team to date.
- As a Leader @ Cisco, I have worked on several features and impacted a lot of diverse product areas:
  - Building Security: Implemented SAML SSO for Firewall Management Center and led the subsequent domain support for SSO user functionality. Led the development of OAuth2 based product auth workflow. I helped design, develop and deploy security solutions that will allow our customers to perform NetOps and SecOps with ease, at low OpEx and with assurance of security and compliance. Built product Serviceability improvements and Observability enhancements for better tracking of issues in SaaS environments. Delivered containerized Security Solutions for low end devices supporting MSSP customers and serving small to medium sized enterprises.
  - Compliance: Led FedRamp certification activities, collaborated and coordinated Cisco Product Security Baseline compliance activities, fixed CVEs reported by the Product Security Incident Report team that resulted in generation of several million dollars in contract approvals from Cisco's partners. I also lead our g11n internationalization and accessibility implementation and testing with several cross-functional teams to increase Cisco products' accessibility and outreach.
  - AI and Automation: Deployment and integration of an AI Agent using Large Language Models for handling network security, User Identity for AI agent users, Building the data pipelines for the RAG models, Product automation quality tracking and improvements.
  - Infrastructure and Operations: Device Telemetry, Jenkins CI management, Onboarding on-prem solutions to cloud, Data queue optimization.

- Auditing and Reporting: Product Licensing usage auditing, User activity tracking.

Technical Product Manager @ Cisco Systems Inc., USA

Jan 2019 – Sep 2021

- Led the design, development and testing of the key feature of Single Sign-on using SAML 2.0 and increased adoption of the FMC product by 25%.
- Led the development of Native multi-factor authentication solutions.
- Helped bring in \$11 million in revenue by delivering high-priority customer requests in a timely manner.

Software Engineer @ Cisco Systems Inc., USA

Sep 2017 – Dec 2018

- Worked on designing, developing and testing software for Cisco's security product portfolio.

---

Cybersecurity Researcher @ UMBC Ebiquty Research Group, USA

Aug 2012 – Aug 2017

- Invented a context-dependent access control methodology for Android using Semantic Web technologies.
- Created a custom Android operating system that could be deployed on a mobile device to perform context-dependent access control.

---

Mobile Privacy Researcher @ Samsung Research America, USA

Summer 2014

- Created access control systems protecting users' data privacy through obfuscated data.

---

Ph.D. Intern @ Apple Inc., USA

Summer 2013

- Using data analytics identified areas of accuracy improvement for Apple's Siri.

---

Intern @ Symantec Corp., USA

Summer 2011, 2012

- Developed web solutions for automated testing of Symantec products.

---

Teaching Assistant @ University of Maryland, Baltimore County, USA

Aug 2010 – May 2012

- Assisted professors with managing the course load, held network security vulnerability discovery labs, graded student papers and proctored exams.

---

Software Engineer @ Tata Consultancy Services

Sep 2007 – Apr 2010

- Developed API clients and carried out ETL operations using PL/SQL.

---

## EDUCATION

Doctorate in Computer Science, University of Maryland, Baltimore County, USA

2010 – 2017

Bachelor's in Information Technology, Jadavpur University, India

2003 – 2007
